Comprend un tampon d'empilage en plastique

Flexibles 10-fach verleimtes Buchenschichtholz /
Flexible 10-ply glued beech plywood /
Bois lamellé-collé flexible en hêtre, collé 10 fois

The stackable seminar chair YAREN is a proven classic for project and training areas. Its softly curved seat shell made of laminate-coated molded wood is available in three finishes and appears both clear, high-quality, and durable in everyday use. Depending on the room concept, you can choose between a stable four-legged steel tube frame in black or chair legs made of elegantly shaped solid oak. The shell consists of robust, flexibly yielding 10-layer glued beech plywood – for high stability even with intensive use. The metal frame is stackable and, thanks to stacking buffers made of soft plastic, quiet and gentle on materials during handling.

- stable, stackable steel tube frame
- robust and flexible 10-layer glued beech plywood for high stability
- incl. stacking buffers made of soft plastic
