

## CHAIR BRAN

The Bran model is now bringing the popular industrial style outside. The stackable chair, which can also be used indoors, impresses with its combination of a black powder-coated steel frame with a seat and backrest made of transparent lacquered acacia wood. The puristic design and the special grain of the wood give it the used look which is typical of the industrial style. Bran is equipped with plastic floor gliders and can be supplemented by the 40 x 40 cm Camilla cushion.

- stackable
- Light and stable
- Solid molded wooden slats in the seat and backrest
