

DINING TABLE **ELON**

The table frame Elon, in dining table height, offers height compensation of up to 18 mm thanks to the integrated mechanical levelling technology. Therefore the table frame is suitable particularly for uneven surfaces, such as paving stones. The frame made of powder-coated aluminium is available in the colours silver or black and can be combined with round tabletops with a diameter from 60 to 80 cm and square tabletops with a size from 60 x 60 cm to 80 x 80 cm. Elon has a tilting mechanism for sideways stacking. The frame, which combines functionality and design, was awarded the 2017 Red Dot Design Award.
